

What we do

Dealer Solutions is a software development and business solutions company specialising in the Australian Retail Motor Industry. Founded in 1992, Dealer Solutions has spent many years building up a range of solutions to help dealers in nine key areas.

Building and managing Website Inventory

Dealer Solutions will help you set up and manage your website inventory. This keeps your website inventory up to date and independent in a cost effective way. We have the experience, the software and the systems to help display your website inventory in a way that is true to your brand. And with our Search Engine Optimisation techniques, we can make your vehicles easier to find and lift your brand profile.

Managing Inventory Distribution

Dealer Solutions Online Manager allows you to take control of your inventory distribution. With our distribution network at your fingertips, you control who gets your inventory. As we support the widest choice of Lead Generators, you can choose exactly where you want your vehicles to go. It all adds up to independent inventory distribution that works for you.

Developing Dealership Software

In 1992, Dealer Solutions began working to computerise many of the manual administrative tasks in a motor dealership. Over the years, this work has been consolidated into leading dealership software packages. StockIt is the entry level software package for small used dealerships. The next step up is Dealerlogic, Australia's premier stock management and financial package for used dealerships.

Building customised Dealership Websites

We will help you create a strong independent web site that carries your brand promise to the buying public. Not only can we help you configure your web site to optimise search engine performance, we can also help you manage your internet inventory in such a way that your entire stock range looks professional and attractive, as well as always up to date.

Mastering Lead Management

To convert your online investment into sales, you need to manage internet enquiry and convert leads into customers. Sales Highway is an intelligent lead management solution developed by Dealer Solutions with constant input from Australian Dealers, so we know it delivers exactly what you need.

Taking Automotive Photography to the next level

With more and more customers using the internet to research and shop, it's important to catch their interest with professional pictures that showcase your range to best advantage. Our full time, professional photographers specialise in high quality, digital photography to help you achieve a winning result.

Integrated Accounting Capability

If you've tried to run a motor dealership using an off the shelf accounting product, you'll know the intricacies of the Australian motor trade are too complex for a simplistic program to process. Dealerlogic Accounting not only does this work effortlessly, every transaction entered to the stock system updates the general ledger seamlessly.

REVS & Vcheck: Protecting Dealers and customers

The Register of Encumbered Vehicles (REVS) gathers recorded encumbrances for motor vehicles, motorcycles and vessels. It also lists information relating to stolen vehicles and this important data is now available via Dealer Solutions. We are also an approved supplier of the Vehicle Information Certificate (Vcheck), a product launched by Queensland Transport in September 2005.

Managing Forms and Compliance

How many forms do you need to fill in every day? Dealerlogic Plus has the forms you need loaded into the master program and these are automatically printed for you to work through with your customers. You are also provided with a guide as to what forms need to be completed for each sort of purchase.

We'll give you solutions

At Dealer Solutions, we develop strong, real world solutions that can improve your business. We remove drudgery, streamline processes, manipulate data, and create exciting customer interfaces. We help dealers manage more efficiently, create additional customer appeal and give sales teams more time to sell. We're an independent source of timeless solutions and we look forward to demonstrating how effective our solutions can be.
